

NAME of activity	Creation of music instruments DIDGERIDOO
duration	1 Hour
audience	from 6 years old from 6 to 10 people
Pedagogical goal	- discover a new instrument - play with sounds and breath - discover new technics and new materials
description	Take a PVC tube of 32mm of diameter and 1,25m long. Warm up one side of the tube with gaz, and once it is soften, put a bottle of wine inside, so it will go wider. Make some beewax melt (or candles) in a micro-wave or a water-bath, and put the side of the tube several times, wait each time until each layer of wax dries on it. Do it again until the diameter goes down to 20mm. Paint the didgeridoo. The wider the tubes are, the lower the sound will be
Material	PVC Tubes, beewax or candles, microwave, gas cooker
Space	Kitchen
Comments	Participants must try their instrument at each step of the building, so they will get the good mouth opening
Restitution	Play after building !
